

Peerless, **ultra-high-resolution 3D color laser scanning** for digitization and creation of textured limited edition prints.

## PRINT STUDIO

Arius offers a print service for artists wishing to create limited edition works with texture and elevation. The most advanced scanning and printing technologies enable highly refined prints truly representative of your original works.

## ARIVU VIEWER

Arivu™ enables artists to easily showcase their creations digitally. This interactive online viewer enables prospective collectors to delve into the brushstroke details of your work, with proper studio lighting. Digital files are also VR/AR ready.

## PROVENANCE

When a work is scanned, the resulting Art Digital Master File (ADMFT™) captures surface detail with 10 micron accuracy. Subsequent scans can prove the authenticity of your work, adding value and preventing fraud.

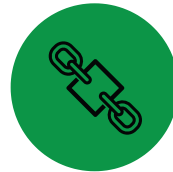

## ARIUS FOR ARTISTS

### ARE YOU A PAINTER?

#### TEXTURED PRINTS

Have your painting or drawing scanned by us to create an Art Digital Master File (ADMFT™). Our print studio will then be able to create textured limited editions of your originals with brushstroke-level accuracy.

#### GET ONTO THE BLOCKCHAIN

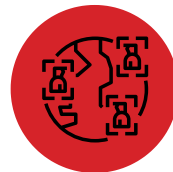

Our ADMFT™ is a blockchain and metaverse ready digital file that is an essential part of the provenance of your painting. It also enables you to bring your physical artwork into the digital realm, unlocking fresh revenues by creating and minting NFTs.

### ARE YOU A DIGITALLY NATIVE ARTIST?

#### IMMERSE YOURSELF INTO THE 'PHYGITAL' WORLD

Print your digitally created works to produce complementary physical series in analog medium.

#### REACH NEW AUDIENCES

Investigate Arius' **alta Creative Studio**. Whether you are coming from the physical or digital art worlds, blend the two with the guidance of our in-house master printmaker to create original works.
